

Title of Depth Study

Name: _____ CWID: _____

The above student is your advisee and plans to graduate this (December, May, August). Please indicate the title of the depth study which will appear on the official Transcript. The major guideline is that the title of the depth study should reflect accurately all related courses and experiences which have been completed or are underway. Any depth study whose title is the same as a major in another division should contain exactly the courses required by that division for that major. For example, if the depth study is “biology,” the student should have completed all of the requirements for a major in biology in the College of Arts and Sciences. Otherwise, the depth study title should indicate there is a difference, for example, “interdisciplinary/biological sciences” or “biology-mathematics.”

I have reviewed the above student’s curriculum in New College and I recommend the title of the Depth Study be _____.
